**Message Body:**

I would like to make a submission supporting Enfield as a centre for sustainable growth on the M4 corridor.

With increasing number of residences and dwellings in Enfield there is a parallel demand for public services and amenities. There is an ever increasing demand in Enfield across educational, public transport as well as the need for social developments and a manned Garda Station.

Enfield has primary access to the main artery of our motorway network in Ireland yet we fail to take advantage of this. It is imperative that Enfield be included in any regional development plans so that sustainable growth may be created.

Increased demands on public transport, increased carbon emissions, lower standards of living for families are the result of failure to support local and regional development in this country and Enfield and Co Meath should be the first to take steps towards changing this.
