**Message Body:**

Due to the substantial growth that Enfield has had recent and will have in the near future, I suggest that street lighting be put in on the Enfield ring road. Every night there are hundreds of walkers and runners on this small stretch of road and it is absolutely pitch black. There is nowhere else for people to go walking or running. At the moment it is very dangerous.

Lighting would only be needed for a small stretch of the road from the lights at the junction of Johnstownbridge Road to the roundabout at the Kilcock side of Enfield.

Having adequate lighting in a dangerous area that is frequently used by locals would be a huge asset to the town.
