Message Body:

The population in South Dublin is already huge and is expanding rapidly with house builds. The road network is unable to handle current traffic with out additional housing going into the area. Also very poor sign offs for builder not to provide suitable roads around new developments. We need this transport A.S.A.P. It will make a huge difference to climate with a reduction in the amout of cars on tge roads. Look at each car going by always 1 person in each. Get the cars off the road, improve everyone lives it way past the time for this transport.
