Subject: Metro extension

Sir/Madam,

A reliable and frequent metro service is urgently needed in [Knocklyon, and Firhouse, Ballycullen](#) area. The area is has been constantly expanding with hundreds of new houses and estates built and more in the pipeline yet there have been Limited improvements to the local public transport routes with only one bus service the 15 & 15b operating in a very busy area. Cross city connections are virtually nonexistent and it takes over an hour and a half to get into town in morning rush hour due to lack of bus lanes. As a result more people are driving.,

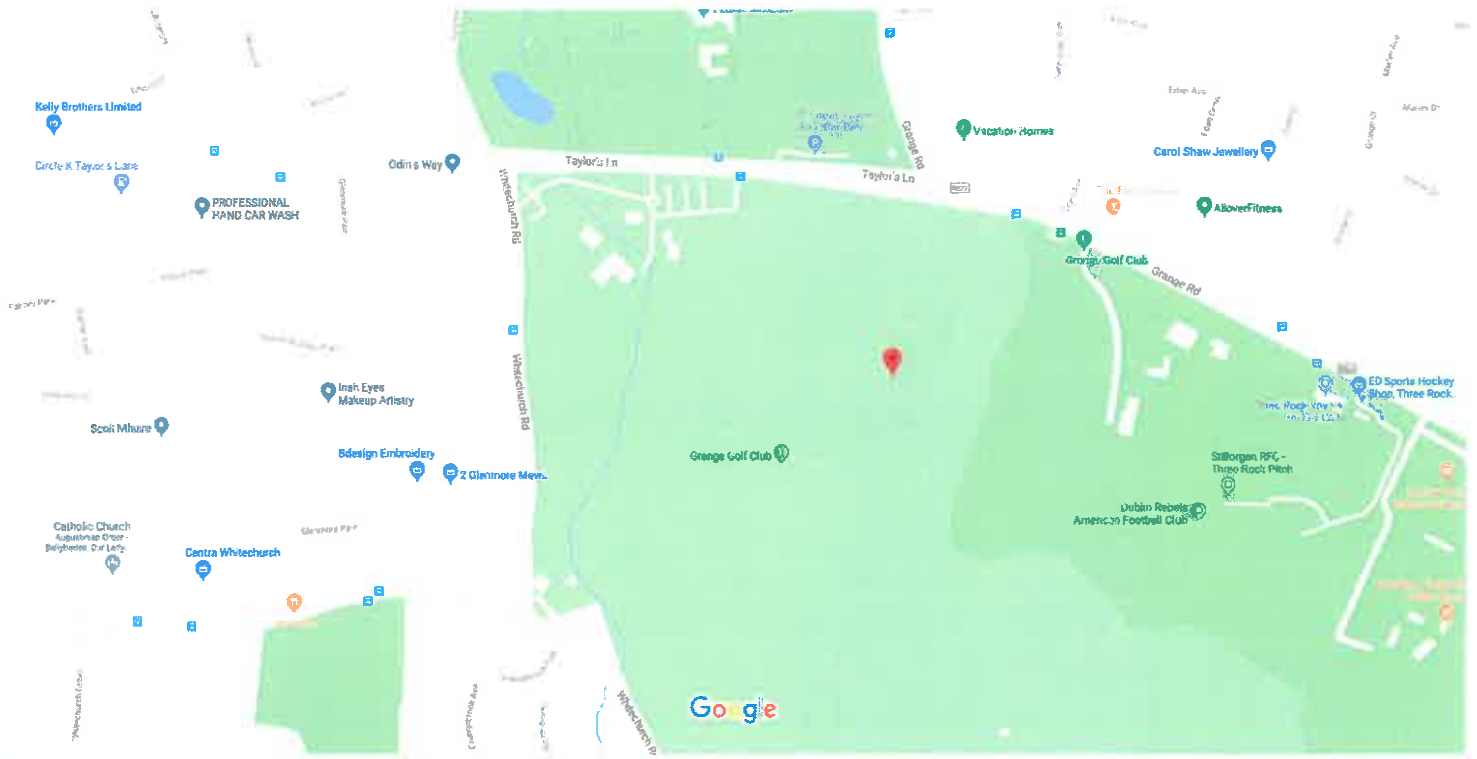

Approach ways to Junction 12 m50 need to be reworked as single lane carriageways are not able to cope with the volumes of traffic, and there are huge queues at ballycullen roundabout from morning rush hour and again in the afternoon up to 8.30pm at night.

Therefore, can you please consider extending the metro out from rathfarnham. An effective and efficient public metro service in our area would reduce the need for cars. As it stands, the problem is getting worse and our commute is becoming even more intolerable .

Thanks for your time.
