Message Body:

Dear Sir/Madam,

When considering issues for The Regional Spatial and Economic Strategy, I would encourage you to consider the following two issues: 1. Proper rain water conservation incentives for private houses and businesses, including rain water collection from roads. This would help maintain our roads, prevent flooding, and also increase our ability to protect our clean water supply. 2. I would like for there to be an improvement in recycling bins, but outside shops and supermarkets and public transport points. Bins outside a local shop are usually filled with cans, paper, plastic and cartons, all of which goes directly to general waste landfills. If there were even simple recycling separation bins available there would be an immediate marked reduction in waste going to landfill. Lidl offer such a series of bins, and it is highly utilised/effective.

I want to thank you for taking the time to consider my submission. I would hope that my position as a private individual lends weight to my suggestions as they reflect direct lived experience and needs based upon this experience.

Yours Sincerely,
Jane Perneel.
