Organisation: Concerned individual

Message Body:

I am really happy this Assembly is set up and working for the benefit of us all. I am also concerned at how this region is to be developed in the future and I live in a very rural part of Wicklow. I have particular concerns over:

Waste/Transport/Energy-Climate change.

Plastic waste needs to be abolished, obviously over a period of time, we either need compostable plastic or revert to glass and metal that are easily recyclable and with a money back option to encourage recycling.

Transport: Car parks at train stations needs to be free or the rate included in the train fare in the 1900s there were 100 trains a day between Dublin and Bray! Also footpaths in rural areas would benefit all: Safe for individuals &/or groups also social * healty * appealing to tourists * beneficial healthwise. Solar powered lights that store light for use at night and lighth the paths could reduce artificial light pollution.
